***Report on the physical interpretation of the technology
of Pranan circuits***

CONCLUSION

The panels manufactured and sold by the company Pranan Technologies may be able to capture ambient energy and filter it, due to being received by people as non-Hertzian waves with an extremely low frequency, contributing to their balancing when faced with external tensions and fields that tend to destabilise it.

*Name and address of
Manufacturer:*

PRANAN TECHNOLOGIES
*Madres de la Plaza de Mayo 44, 2^a planta
31013 Pamplona (Navarra). España*

Study objective:

Plates. Nanotechnology Circuits
