

PRANAN DEVICES

TECHNOLOGY FOR PROTECTION FROM ELECTROMANGETIC RADIATION

The Pranan devices are the result of an exclusive, highly technological fabrication and design system that enables them to effectively protect the human body against alterations caused by electromagnetic pollution generated by wireless communications and external radiation that reaches us (5G, 4G, telephone towers, Wi-Fi, etc.) and contaminate our homes and workplaces.

WHAT DEVICE DO I NEED?

To provide total protection for a person, we recommend Phiwaves (either the card or the pendant version), together with Phone.

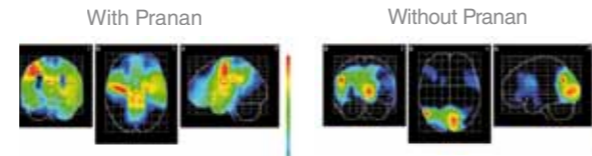

Phone acts as a reinforcement. When we talk on our mobile phones, we place the radiation emission sources close to our brains and we need an efficient shielding device on the mobile phone to ensure effective protection. Furthermore, we recommend placing Phiwaves under your pillow when you sleep. These two devices will protect you both inside and outside the home.

On the other hand, when it comes to protecting your home, all the family members who use Phiwaves will be protected. Those who don't can use Biospace, which has a range of about 380 m2 and a protective radius of 11 m, on both the vertical and the horizontal plane. Biospace is especially recommended when the area to be protected (home, office, etc.) is exposed to high levels of electromagnetic radiation

 Scientifically manufactured for the protection

PROVEN EFFICIENCY

COMPLUTENSE UNIVERSITY
Bioelectric Study by EEG.

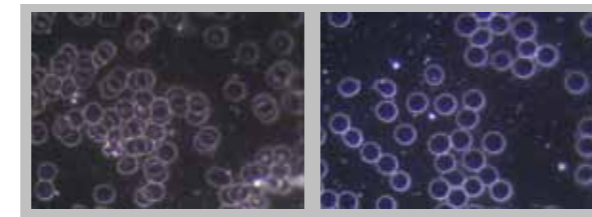

GRANADA UNIVERSITY
Biochemical study. Blood samples.
Free radical and inflammation Biomarkers.

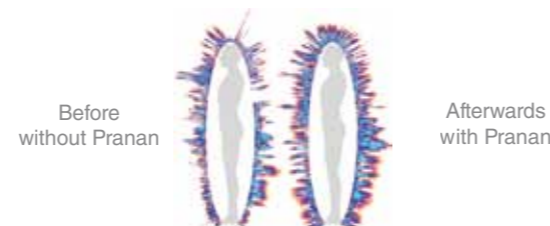

OPTIKA 500TDK MICROSCOPY
CLINICAL TRIAL

Blood analysis. Red blood cells. Exposure to electromagnetic pollution.

GDV-EPC BIO-ELECTROGRAPHIC STUDY
By Dr. K. Korotkov (St. Petersburg University)

CERTIFIED TECHNOLOGY

TECHNOLOGY ENDORSED BY
CLINICAL TRIAL

The efficacy of the Pranan electromagnetic protection technology has been tested in Research Centres and internationally-approved Universities (Universidad Complutense, Universidad de Granada, Universidad Politécnica de Catalunya, GDV-EPC of University of St. Petersburg).

The only technology that, due to its efficacy, has been published in scientific journals such as the "European Journal of Integrative Medicine," "International Journal of Advanced Complementary and Traditional Medicine" and "Nutrition and Integrative medicine"...

The Pranan devices have an embedded microchip that enables their authenticity to be verified. Nefertitys System. (Jerónimo de Ayanz Technological Centre).

PRANAN CERTIFICATES

The Pranan devices are certified by Tüv Rheinland pursuant to European Directive 2001/95/ EC, which guarantees that they comply with all the requirements related to safety.

Patented Technology entitled "Electromagnetic radiation shield" No. CC P: ES 2401873 A1.

Certified by Tüv Rheinland pursuant to Directive 1999/5/EC on radio electric equipment and telecommunication terminals.

Certificado de Calidad conforme a la ISO:9001:2015.

ISO:9001:2015 Quality Certificate. EC Mark Certificate (TÜV Rheinland).

Innovative Enterprise Seal (Ministry of Industry).

Moderna Seal (Dept. of Industry, Regional Govt. of Navarra).

DEVICES FOR THE
PROTECTION FROM
ELECTROMAGNETIC RADIATION

PATENTED TECHNOLOGY

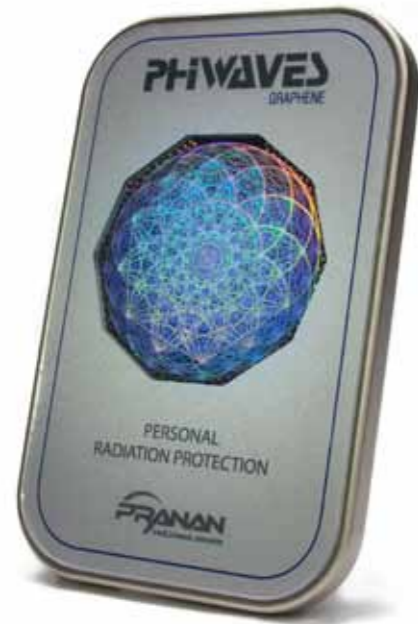

PRANAN
TECHNOLOGIES

EFFECTIVE PROTECTION FROM 5G

PHIWAVES

PERSONAL PROTECTOR THAT PROTECTS FROM ELECTROMAGNETIC POLLUTION, INCLUDING 5G

FEATURES 24/7 personal protection Radius of action 130 cm. (range of 2.6 metres).
Dimensiones: 83 x 52 x 5,4 mm.

USE No limitations in use. Can be carried in the pocket or bag at work, when walking or when, travelling, or kept close by while sleeping.

PHONE

DEVICE THAT PROTECTS AGAINST RADIATION EMITTED BY MOBILE PHONES

FEATURES Protector against radiation emitted by mobile phones (including next-generation 5G phones) when talking or when switched on. Radius of action 70 cm. (range of 1.4 m.).
Dimensiones 36 x 52 x 2,5 mm.

USE Stick it on the back of your mobile phone, telephone or on the housing.

PHIWAVES PENDANT

PERSONAL SHIELDING DEVICE IN THE FORM OF A PENDANT THAT PROTECTS AGAINST ELECTROMAGNETIC POLLUTION, INCLUDING 5G

FEATURES 24/7 personal protection with a radius of action of 100 cm (range of 2 metres).
Dimensiones: 36 x 52 x 4 mm.

USE No limitations in use. Can be worn as a pendant at work, when walking or when travelling. Can be worn while sleeping, or kept close by.

BIOSPACE 8-V-11

DEVIDE THAT PROECTS YOUR HOME OR OFFICE AGAINST 5G, WIFI, TELEPHONE TOWERS AND WIRELESS NETWORKS

5G

FEATURES

Creates a spherical space of free protection against the effects of electromagnetic pollution. Its radius of protection is 13 m., equivalent to 530 m2.

Dimensions: 9 x 2 x 23 cm.
Weight: 1000 g.

USE

Place in the area to be protected from electromagnetic radiation.

GROUNDBREAKING TECHNOLOGY

The Pranan 5G devices are manufactured with groundbreaking technology (graphene circuits). Their duration is unlimited (they require no maintenance or batteries) and are activated automatically in the presence of electromagnetic

WHAT DO THEY PROTECT FROM?

The PRANAN 5G devices effectively protect the human body from alternations caused by electromagnetic pollution generated by Wi-Fi waves, 5G, radars, telephone towers, etc. that are used in everyday life.

WHY ARE THEY UNIQUE?

Because they function like auto-transformers. In other words, they balance the alteration generated by electromagnetic radiation. For this reason, they are extremely effective as shielding devices and highly recommended for electrosensitive persons.
